All about me:

I come from China and I live and raise in Wuhan which is the capital city of Hubei Province. I feel so lucky that I have a big family. I have three sisters and one brother, by the way I'm the youngest. I join a program named 2 + 1 (including 2 years learning in China and the last year schooling in Canada ) in my Chinese school, which provides me a chance to study overseas and broaden my horizon. I'm so happy that I have an opportunity to go abroad and I enjoy the time in Canada everyday. Canadian people are friendly and I think I do have a good experience in a multicultural country. Canadian schooling is different to traditional Chinese school, which is focus on developing students' characteristic rather than emphasising how necessary the examination is. In China I don't have much time to cultivate my hobbies as a result of pretty much homework after school, whereas in Canada I join basketball and go to many place to take part in competition. I like Canada, an amazing place. I hope I can finish university in Canada and learn more about Canadian culture.
