

Name: Valeria Sandoval

City of birth: Cucuta

Country of birth: Colombia

All about me:

My name is Valeria sandoval i'm from Cucuta - Colombia , it's a really warm city , we have a lot of mountains , a lot of green zone , the people are really friendly , our food it's really good and every time that i travel i'm feel so happy to be Colombian . I've eighteen years old , my birthday is on september nine , i have one brother and one sister older than me , they're in the university my brother is taking engineer and my sister is taking international business , my parents have a travel agency they have worked together for thirty five years , i graduated in 2015 from " El carmen teresiano " a school with only girls , it was the best year for me . the most important of my life is my family without them i'm not nobody , they are my balance , my motivation and every day i'm so proud of them and i thank god for be part of their lives . i like to listening music , i love the photography , every day i work out , i try to be healthy , i do my best with that , i love the animals i think they are part of the life of us , i'm good in science , my favorite class at school was chemistry , my favorite color is black and green , i don't like the hypocritical people , i hate the lies , i like to know new things , new people , new cultures it's very interesting . right now i'm living my rotary exchange in Kamloops-Canada i will stay here until december , i arrived on January 8 and my english it wasn't good , i could understand a lot of things but i couldn't talk well but right now i have here 3 months and my english is going better every day , when you understand more you feel so happy and you want more and more , my ' system' it's really different than the international students , i have to change my host-family every three months and i have a lot of rotary activities every month , at school i'm taking easy subjects

cause i graduated in Colombia and i just need improve my english so right now i'm taking two blocks of english one is with the international students and the other one is with canadian classmates , art and metal work , the canadian system at schools it's really different of the colombian system , in Colombia we have ten subjects in the day , we start the school at 6:30 am and we end at 2:55 pm . In the beginning you will feel a little bit weird in the school , but in the time you are meeting new people and everything improve , the experience its unique and every day you have to live it to the fullest , for me the english it's very important because when i return to Colombia i will go to the university and i'll take medicine and it's a requirement the english in your life paper not just for medicine in Colombia if you speak differents languages

You can find a better work , can pay you more , it's like a advantage . Finally i feel so blessed to be here and learn the culture , meet new people , and the most important learn the language , i hope in a couple years i can return here and meet all the people i met and were important in my trip .
